8. Battery or Power Source: The Drone Jammer gun should be battery powered and should be able to charge by AC supply.
9. Drone Jammer gun Configuration: The Drone Jammer gun OS/Software can be upgraded online or offline.
10. Remote Operation: It can be operated remotely, allowing operators to remain at a safe distance from the jamming area.
11. Integration: It should have an optional facility to integrate it with other Detection, security and surveillance systems.
12. Mobility: Portability and ease of transportation for rapid deployment when needed.
13. Recording and Reporting: It should have recording of jamming events and provide reports for post-incident analysis and documentation.
14. The Anti-Drone Drone Jammer gun should be designed for portable or hand held use.
