Specification of Benchtop Capillary Electrophoresis System for Human Identification Services (DNA Sequencer)

1. Fluorescence based, fully automated 8 capillary electrophoresis system along with all hardware and software needed for generating DNA profiles from different types of forensic samples.

2. The system should be capable of doing fragment analysis.

3. The system, analysis software and all major accessories should be validated as per the SWGDAM guidelines for forensic DNA testing.

4. Validation Certificate for Forensic applications should be enclosed with the bid and should be supplied for equipment in accordance with guidelines from the Scientific Working Group on DNA Analysis Methods (SWGDM) to be used for Human Identification testing and Forensic DNA Application.

5. System should be compatible with commercially available 5 or more-dye labelled STR kits.

6. Auto sampler capacity: Must have automated sample injection system compatible with four 96-well plate positions.

7. Capillary array with 36cm length.

8. Pre-filled consumables and should use Radio Frequency Identification (RFID) to track key consumables.

9. System shall be supplied with starter kit necessary for installation.

10. The system should have the feature of pausing a run and support to load additional plate and re-order injections after run is paused.

11. System should be provided with suitable high end branded computers/laptops along with operating hardware.

12. Room setting including air conditioning, table, chair and required amenities should be provided.

13. Forensic specific validated software (as per SWGDAM guidelines) for data analysis (Human Identification purpose).

14. Systems should be provided with all consumables for fragment analysis and sequencing applications.

15. Vendor should be capable to validate instrument with Human Identification Professional Services as and when required. Optional Laboratory validation services

available from the supplier/manufacturer for the instrument on site to satisfy the applicable guidelines used by the forensic community and are fit for the customer's human identification applications.

16. All the relevant brochure and certifications should be provided for adherence of the submitted compliance sheet for the tendered specification.

17. Power backup: A compatible online UPS with minimum one hour backup should be provided for the complete setup.

18. The warranty for the equipment and for other accessories should remain valid for a period of three years from the date of commissioning.

19. CMC should be provided for three years in expiry of warranty at a rate of not more than 3% of the value of the instrument.

20. IQ-EQ certification should be provided during installation and for subsequent periods.
